▫ WILHELMINA

WILHELMINA

Name ▫ Wilhelmina
Species Anna's Hummingbird
Appearance Has a cluster of 4–5 red spots amongst very fine even specks across chest. Slightly down-turned bill.
Behavior Often hovers just above the port before perching
Tends to perch on the edge and preen or rest between sips. Rarely chases others—more of a “wait-your-turn” visitor who comes when its quiet
First Spotted 6/22/25
